

# Selectores CSS

Identifican:

- ✓ Elementos a los cuales se les aplicará un formato específico (estilo)
- ✓ Se aplican generalmente a etiquetas

Tipos:

**Etiqueta**

```
h1 {  
  color: blue;  
}
```

Diagram annotations for the tag selector example:

- A box containing the text *h1 es el selector* has an arrow pointing to the `h1` selector.
- A box containing the text *Estilo a aplicar* has an arrow pointing to the `color: blue;` property.

**De clase**

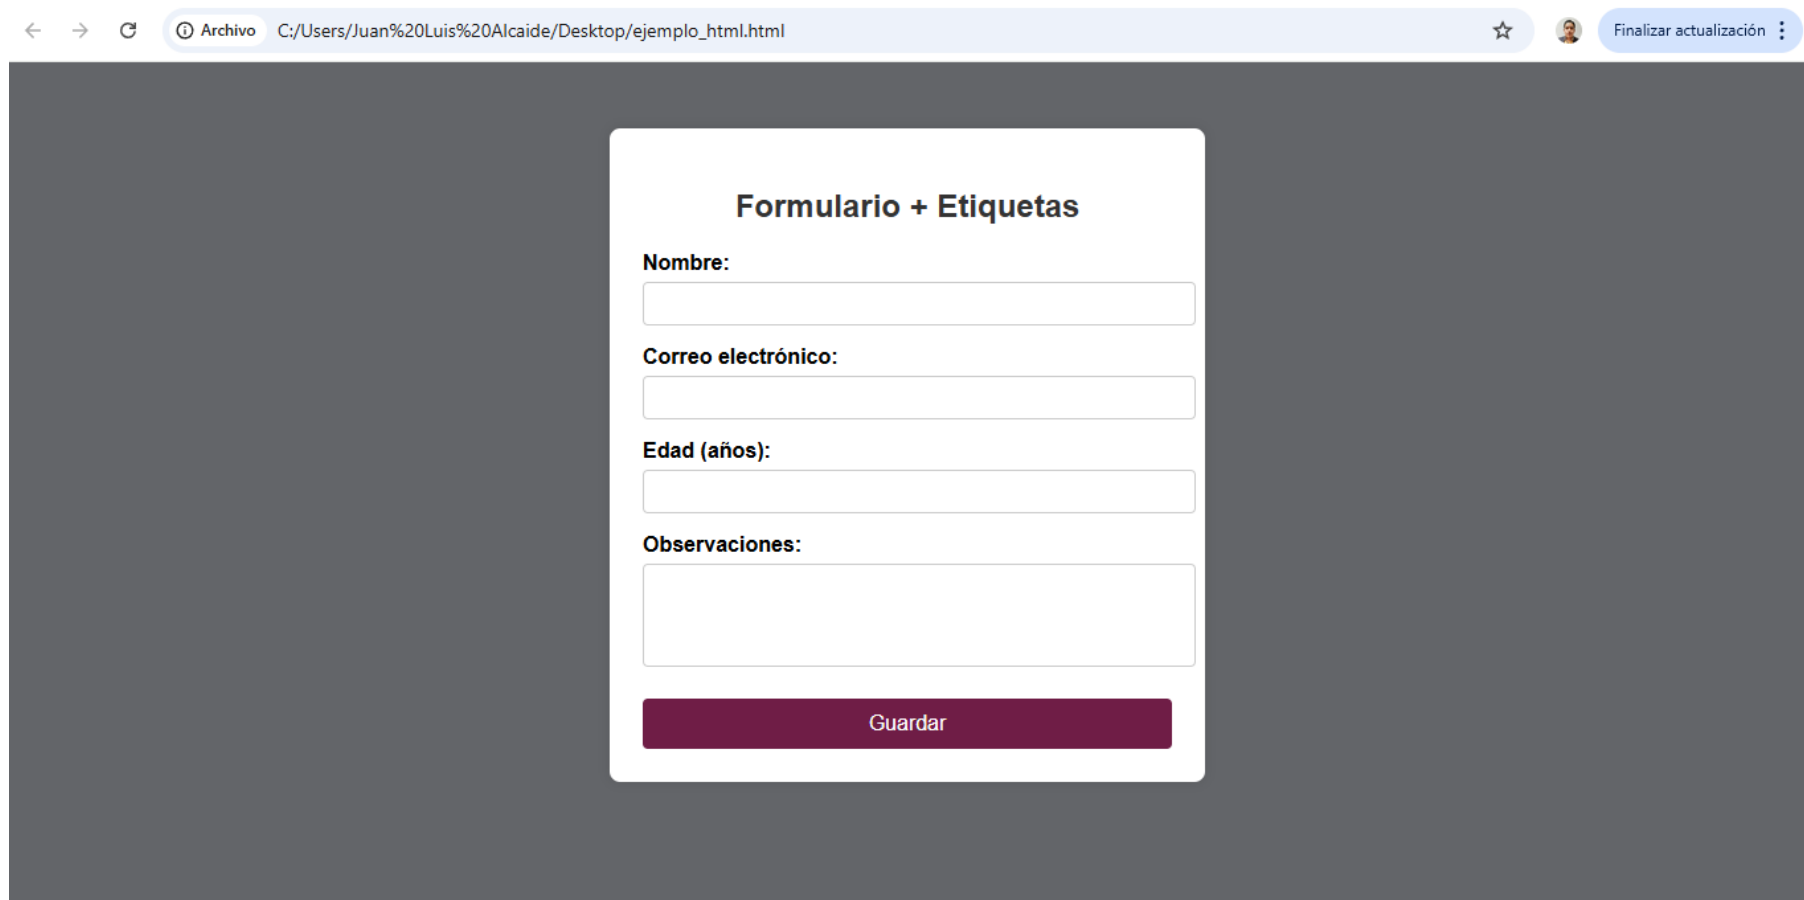

```
.botones {  
  color: black;  
  background-color: #6f1d46;  
}
```

Diagram annotations for the class selector example:

- A box containing the text *Nombre de la clase* has an arrow pointing to the `.botones` selector.
- A box containing the text *Estilo a aplicar* has an arrow pointing to the `color: black;` property.
- Another box containing the text *Estilo a aplicar* has an arrow pointing to the `background-color: #6f1d46;` property.

# Conjunto de etiquetas

Ejemplo:

The screenshot shows a web browser window with the address bar displaying "Archivo C:/Users/Juan%20Luis%20Alcaide/Desktop/ejemplo\_html.html". The browser interface includes navigation buttons (back, forward, refresh), a star icon, a user profile icon, and a "Finalizar actualización" button. The main content area features a white form titled "Formulario + Etiquetas" centered on a dark gray background. The form contains the following elements:

- Nombre:** A text input field.
- Correo electrónico:** A text input field.
- Edad (años):** A text input field.
- Observaciones:** A larger text input field.
- Guardar:** A dark purple button at the bottom of the form.
